Shares traded on Bangalore, Madras, Bombay Stock Exchanges

(In Rupees)

	Bangalore		Madras		Bombay		Total	
Name of the company	High	Low	High	Low	High	Low	High	Low
Colgate	438	396	420	395	452.5	413.75	1310.5	1204.75
L & T	148	140	189.5	180	190	180	527.5	500
NEPC Tea	28	22.75	28.25	23	29	24.5	85.25	70.25
Reliance	190.5	177	189	177.5	191.25	177.5	570.75	532
Tata Steel	160	143	158	140.5	161.25	142.5	479.25	426

1. The average of the high rates of share in all the three Stock Exchanges for NEPC Tea is

1. Rs. 28.4 2. Rs. 28.25 3.Rs. 29.1 4. Rs. 28.7

2. For Reliance, the low rate of share is less than the average of the low rates of shares of the same company, in the Stock Exchange at

1. Madras 2. Bombay 3.Bangalore 4. None of these

3. In the Bombay Stock Exchange the difference between the high rate of share and the average of the high rates of share is highest for

1. L & T 2. Colgate 3.Reliance 4. Tata Steel

4. For Tata Steel, the ratio of the high rate of share to the low rate is maximum in the Stock Exchange at

1. Bangalore 2. Madras 3.Bombay 4. None of these

5. The low rate of share in L & T at Madras Stock Exchange bears a ratio, to the total low rate of share of the same company, of

1. 8/19 2. 9/20 3.11/25 4. 9/25

DIRECTIONS ***for questions 6 – 10:****Refer to the table below. The information given is related to all the products produced by Sandy ltd.(Data is given for one unit of a product)*

Product	Purchase Price	Over-Heads	Service Charges	Total
T4	125.83	7.33	7.83	140.99
T9	138.85	8.69	7.11	154.65
T35	124.62	7.48	7.21	139.31
T64	134.00	7.60	8.43	150.03
T99	138.20	7.28	7.71	153.19
T54	146.88	11.25	12.54	170.67
N96	100.00	5.00	18.92	123.92
N95	100.00	5.00	18.92	123.92
E2	136.79	9.22	7.99	154.00

6. In how many products is the service charge less than 5% of the total price?

1. 0 2. 1 3.2 4. 4

7. For which product is the ratio of procurement price to the total cost the highest?

1. T99 2. T35 3.T54 4. E2

8. The product absorbing the maximum total overheads is?

1. T54 2. T9 3.E2 4.Can't say

9. The ratio of highest to lowest service charges is approximately

1. 2.1 2. 1.9 3. 2.7 4. 2.5

10. The number of products for which the procurement price is less than 85% of total cost, is

1. 0 2. 2 3.3 4. 1

Answer Key & Explanations

Sr. No.	Key	Explanation
1	1	High rate of share in all the three Stock Exchanges for NEPC Tea = Rs.85.25. Average = 85.25/3 = Rs.28.42
2	3	Low rate of share for Reliance = Rs.532 Average = 532/3 = Rs. 177.33 In Bangalore Stock Exchange the low rate of share is less then Low rate of share for same. Note: No need to do the actual calculation in question 1 and 2. In Ques1, we have (28 × 3 + 1 + 0.25) = 28 + 0.33 + 0.083 = 28 + 0.413 In Ques2, two of the values are equal, only third is higher, so it has to be higher than the average of all three.
3	2	By Visual Observation; Clearly Colgate has highest value, thus the difference will be highest in this case.
4	3	Ratio of high rate of share to low rate of share in asked towns : Bangalore = 160/143 = 1.12 Madras = 158/140.5 = 1.12 Bombay = 161.25/142.5 = 1.13 Maximum ratio is at Bombay.
5	4	Low rate of share in L & T at M.S.E. = Rs.180 Total Low rate of share of L & T = Rs.500 Ratio = 180/500 = 9/25
6	2	Service charge % of the total price in T4=100 × 7.83/140.99= 5.55% Service charge % of the total price in T9=100 × 7.11/154.65= 4.59% Service charge % of the total price in T35=100 × 7.23/139.31= 5.17% Service charge % of the total price in T64=100 × 8.43/150.03= 5.61% Service charge % of the total price in T99=100 × 7.71/153.19= 5.03% Service charge % of the total price in T54=100 × 12.54/170.67= 7.34% Service charge % of the total price in T96=100 × 18.92/123.92= 15.26% Service charge % of the total price in T95=100 × 18.92/123.92= 15.26% Service charge % of the total price in E2=100 × 7.99/154.00= 5.18% Only in case of T-9 service charge is less than 5% of total price.
7	1	Ratio of purchase price to total cost for T99 = $\frac{138.2}{153.19} = 0.902$ Ratio of purchase price to total cost for T35 = $\frac{124.62}{139.31} = 0.894$ Ratio of purchase price to total cost for T54 = $\frac{146.88}{170.67} = 0.893$ Ratio of purchase price to total cost for T52 = $\frac{136.79}{154} = 0.888$ $\therefore$ Ratio highest in case of T99
8	4	Can't say because we don't know the actual production of each product, and here we are given the costs per product only.
9	3	Highest service charge = 18.92; Lowest service charge = 7.11; Ratio = 18.92/7.11 = 2.66 = 2.7
10	2	It is less in N96 and N95.
